Social Purpose Departments Checklist

Introduction

This checklist is designed to help companies embed their social purpose across all business units, functions, and departments. As social purpose impacts all areas of the business, including governance, culture, strategy and operations, it is important that social purpose companies consider how existing roles and responsibilities need to be adapted to bring the purpose to life.

The following ideas serve as thought starters to help business leaders consider these new responsibilities and job descriptions across 16 illustrative leadership roles and functions. Companies beginning their social purpose journey can use these sample responsibilities to plan transitions over several years. Some social purpose responsibilities may be assigned to existing team members such as sustainability leaders in the early years of integration.

The checklist needs to be adapted to the size and structure of the business as few businesses would have all of these roles and some might be combined. This tool can be used as a framework to identify which social purpose roles and responsibilities are most relevant to your organization, helping to guide strategic planning and ensure that social purpose is effectively integrated in every function.

Some organizations may restructure after adopting a social purpose, by creating a chief social purpose officer role, establishing a new division, or acquiring another company, brand, or product – these are additional ways to integrate social purpose across the organization. There are also cross-functional responsibilities which are highlighted below.

Department leaders can use this checklist to facilitate conversations, update job descriptions, enhance training programs, and explore innovation opportunities

How to Use This Checklist

Review the "role" column and identify the roles that correspond with those in your organization. Consider the respective "social purpose responsibilities" column and determine which of these responsibilities make sense to adopt as low-hanging fruit, or over time. Use this to create a workplan to embed social purpose into business units, functions and departments, along with job descriptions and training programs. From the workplan you can determine goals and targets to integrate social purpose across your organization.

About the Canadian Purpose Economy Project

The Canadian Purpose Economy Project exists to accelerate the transition to the purpose economy. It engages national ecosystem actors to create an enabling environment for social purpose businesses to start, transition, thrive and grow. We are grateful to Coast Capital, our Founding Purpose Champion, for their support. Subscribe to our updates at www.purposeeconomy.ca and sign our Call to Purpose to help us advance social purpose in business.
